

YOUR RELIABLE PARTNER FROM CABLE SUPPORT SYSTEMS TO SOLAR PANEL MOUNTING SOLUTIONS

RELIABLE SERVICE AND SUSTAINABLE SOLUTIONS

Eight product families and over 2,500 products come together to create a basis that generates consistent cable support systems for every construction need. Finnish engineering, design, and manufacturing lay the foundation for it all—ultimately aiming to achieve one main goal: a satisfied customer.

We offer our customers freedom of choice, seamless cooperation, and customer service from the very start of a project through to its completion. Our sales team's expertise is built on years of experience and continuous training. Extensive references and different installation locations with diverse needs guarantee the success of new projects and ensure customer satisfaction. The long career tenures within the company also reflect our strong workplace wellbeing and collaboration among employees. By continually developing work methods and automation, we maintain a high standard of production and logistics. Our delivery reliability is second to none.

Meka® cable support systems are complemented by Meka Solar panel mounting solutions and versatile unipro® lighting track solutions.

QUALITY AND SUSTAINABILITY

Quality systems and environmental responsibility form the cornerstone of the company's operations. The **ISO 9001** and **ISO 14001** certified quality system ensures that only fully finished cable support products meeting strict criteria leave the production line. A high degree of automation, domestically sourced raw materials, and advanced surface treatment technologies create a manufacturing process customers can trust—decade after decade.

Responsibility also extends to achieving carbon neutrality. Meka Pro Ltd. is committed to carbon-neutral operations by 2030. The company calculates the carbon footprint of its products and provides comprehensive information on their environmental impacts, helping customers make responsible choices and meet their own emissions reduction goals. Moreover, the use of recyclable packaging materials and a focus on sustainability at every production stage are part of Meka's responsibility strategy.

MISSION

Meka Pro Ltd. produces high-quality, easy-to-install, and competitive cable support solutions for construction needs.

VISION

Meka Pro Ltd. creates technologically advanced solutions that set the standard in its field and deliver the best user experiences.

VALUES

Meka Pro Ltd.'s operations are based on quality, responsibility, and customer centricity, creating safe, durable, and wellbeing-oriented solutions.

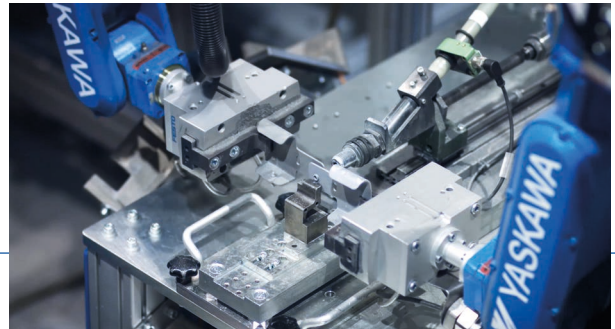

PRODUCT DEVELOPMENT AND INNOVATION

Meka Pro Ltd.'s expertise in product development continuously delivers innovative solutions to meet customer needs. The product development team works closely with production and customer service. Active and effective collaboration relationship between sales and customers is a valuable contribution to the creation of new product ideas. Designing competitive cable support systems relies on professional expertise, reliable design tools, and precise documentation.

EFFICIENT PRODUCTION

A modern, automated production process in the steel industry, leading technological solutions, and advanced production control ensure high product quality and reliable deliveries. A flexible production management system allows for customer-specific customization, even in mass production. Streamlined inventory management and logistics further guarantee high delivery reliability.

EASE OF INSTALLATION

Fast installation is made possible by a minimal number of components, adjustable fasteners, and user-friendly, innovative connections.

All Meka® installation accessories meet the strictest quality criteria, with clear installation instructions that enhance productivity. Smooth installation improves work safety and increases efficiency, ultimately resulting in a satisfied customer and a cable support system to be proud of.

GLOBAL NETWORK

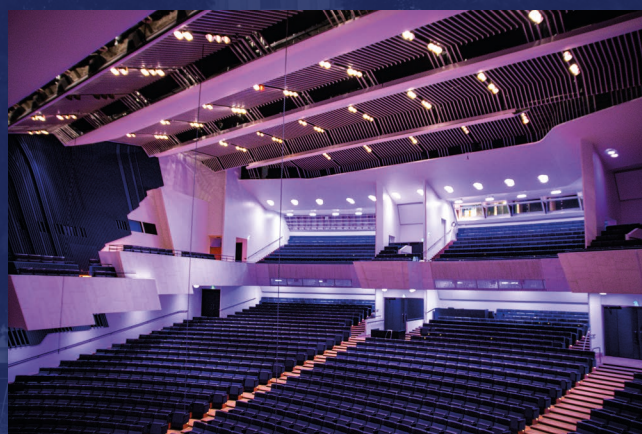

Meka® and unipro® products are designed and manufactured according to Finnish high-quality standards, using the best available raw materials. Customer satisfaction is guaranteed by easy installation and top-tier durability.

The Finnish Meka® and unipro® brands are highly regarded by electrical professionals worldwide. Over the decades, these products have been used to implement thousands of cable support and lighting systems in industrial plants, power stations, shopping centers, and tunnels across more than 100 countries.

EXCELLENCE IN CABLE SUPPORT SYSTEMS

Finlandia Hall is an iconic Finnish landmark designed by renowned architect Alvar Aalto. It serves as a concert and congress venue in Helsinki, recognized for its architectural significance and cultural importance.

The Finlandia Hall renovation project is a showcase of Finnish engineering and architectural excellence. The building's prestigious architecture and high-quality standards were key reasons why MEKA® was chosen as the supplier for cable support solutions. These discreet, well-concealed cable support systems integrate seamlessly into the structure, providing outstanding load-bearing capacity and safety—without compromising performance.

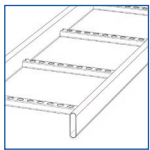

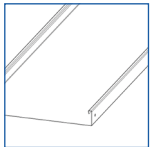

Cable support excellence.

HIGH-QUALITY CABLE SUPPORT SYSTEMS

The foundation of our product range is built on steel-based solutions:
